Changing attitudes with respect to United States military commitments abroad, resulting from various economic and political conditions, have focused increasing attention on U.S. military presence in foreign countries and areas. As of the end of FY 1979, approximately 24 percent of our military personnel were stationed outside the United States; about 23 percent in foreign countries and areas; and about one percent in U.S. territorial areas.

Table P309A shows worldwide U.S. military strengths as of September 30, 1979.

WOMEN IN THE ARMED FORCES

Tables P25.61 through P25.65 provide data relative to female members of the uniformed services from the end of World War II through the present.

However, with the expanded role of women into many other occupational fields during World War II, female personnel strength levels reached a peak of over 266,000 in 1945, or two percent of total active duty military Prior to World War II the number of women who joined the Armed Forces was relatively insignificant, the military medical services had enrolled nurses for many years. al though strength. As of September 30, 1979, 151,082 women were listed on active duty with the military services which approximates 7.4 percent of the total active duty military personnel strength. Although total military strength has declined by 30,479 during FY 1979, female strength has increased by 16,770.

FEMALE MILITARY PERSONNEL BY RANK/PAY GRADE

CONTRACTOR OF THE PROPERTY OF

Table P26.02 reflects the distribution by rank/pay grade of female active duty military personnel in each of the military services.

Increased occupational opportunities and policy changes allowing women with children to stay on active duty are considered contributing factors in a significant increase in the number of women choosing the military services as an employment alternative.

REENL ISTMENT RATES

Fluctuations in overall reenlistment rates are due to variations in the composition of the categories "First Term Regulars" and "Career Regulars." "First Term Regulars" are comprised of military personnel who have served an initial active duty tour. "Career Regulars" encompass military personnel who have served two or more tours of active duty.

In a few foreign countries, however, substantial nationals are designated "indirect hire" civilians. work with the U.S. Forces under contracts or nome countries. Departments,

Both categories of civilian personnel must be included to provide a complete account of the DoD civilian work force. Figures on the number of indirect hire civilians, however, are unavailable prior to January 31, 1953. Tables P30.2 and P30.11 list the two civilian employment categories separately. Furthermore, Table P30.11 distinguishes between direct hire civilians employed to perform military versus civil functions.

RESERVES ON ACTIVE DUTY

Tables R21.0 and R22.0 show the number of reservists, by component, who are serving with the active forces. These personnel are also included in the total active duty strengths reflected in Section II of this publication. Some reservists undergo prescribed tours -- currently four months or more -- of active duty for training. They are not included in this table or counted as part of the total active duty training. strength. There are six Department of Defense reserve components, including the National Guard (Army) and the Air National Guard (Air Force). Continuously, since World War II, there have been large numbers of reservists serving on active duty (Table R21.0).

including an increase during the Berlin build-up in 1961, and an increase to nearly three-fifths reserve officers constitute about one-half of the total officers on active of the total peak officer strength in 1969. Since 1960,

for those periods when reserves were recalled to active duty for strength build-ups, the of enlisted reserves has remained fairly low. Enlisted reserves are dominated by Naval reservists who are serving under a four-year active duty reserve enlistment programs.

RETIRED MILITARY PERSONNEL

Tables P22.8 and P22.81 reflect trends in military retirements since 1950. The number of retired military annuitants has increased by 870 percent since that time. The sharp increase is due, in a large part, to the enormous number of individuals who entered the military service during World War II and who became eligible for annuities beginning in the early 1960's.
